EVGA. X15 MOUSE

INTRODUCTION

Part No: **904-W1-15BK-K3**

EVGA MMO gaming mouse offers a multipurpose MMO Panel, equipped with 12 physical-mechanical buttons and an ergonomic design for Palm grips, providing excellent click and hand feel. You can access multi-layer controls and more buttons according to your needs through the physical E-Shift function system. Powered by EVGA UNLEASH RGB software, full control and customization are at your fingertips. On the fly DPI and profile, cycling allows changing the settings depending on the situation. A USB 2.0 High-Speed 32-bit ARM Cortex-M33 core USB microprocessor, supporting a native 8000Hz report rate, eight times the standard 1000Hz on competing gaming mice. The X15 is also equipped with Light Strike LK Optical switches, designed to provide faster and better stability. The switches are quicker than any mechanical switch and more durable, reaching a life span of 70 million clicks.

KEY SPECS

Sensor System

Main Sensor: PIXART 3389 optical sensor
Max DPI: 16,000
Tracking Speed: 400ips
Acceleration: 50g

Micro Processor

High Speed USB Max Polling
Report Rate: 8,000 Hz
32-bit ARM M33
USB Data Format: 16 bits/axis

Design

Main Switch Type:
LK Optical - 70 million click lifecycle
Number of Buttons: Up to 20
LED Color: RGB lighting 3-zone
Feet Type: Low friction PTFE
Max Number of Profiles: 5

DIMENSIONS

Height: 42.7mm
Length: 123.5mm
Width: 71.7mm
110g without cable
2M braided cable

32-bit ARM Cortex-M33 chip supports a native 8 kHz report rate

Light Strike LK Optical switches are designed to provide faster and better stability

Full control and customization with EVGA Unleash RGB Software

On the fly DPI + 5 Onboard profiles

Ergonomic Desgin

Up to 20 programable buttons
