EVGA DP Hub Installation

1. Ensure that your DP Hub has appropriate power connected.
2. Plug in your DisplayPort cable into the DisplayPort input on the front of the device.
3. Plug in your DisplayPort monitors to the back of the device. The EVGA DP Hub supports a maximum of 3 DisplayPort monitors.
4. Power on your PC. NOTE: If no displays are recognized, press the "SCAN" button.
5. Boot into the operating system and adjust your display resolution as necessary.
