

EVGA announces the e-GeForce 7300 GS - Available w/ S-Video or HDTV Support**Brea, California and Munich, Germany - Wednesday, January 18, 2006** □

EVGA, a leading provider of performance computing hardware, today announced the release of their e-GeForce 7300 GS series of NVIDIA® technology-based graphics cards.

Boasting the 3D graphics features of today's most advanced GPUs - including full support for Microsoft® DirectX® 9.0 Shader Model 3.0 and true high dynamic-range (HDR) lighting - the NVIDIA® GeForce® 7300 GS graphics processing unit (GPU) allows you to experience the latest gaming effects without compromising performance. The GeForce 7300 GS also brings stunning, high-definition video and superb picture clarity with minimal CPU usage with NVIDIA® PureVideo® technology. For the performance and features you need to play the latest games and enjoy home-theater quality video, make sure your PC is equipped with a e-GeForce 7300 GS.

About EVGA

EVGA is the #1 NVIDIA authorized partner in channel sales throughout North America. Based on the philosophy of intelligent innovation, market knowledge, and the real time operation, EVGA continues to identify the need in the market place and providing the solution to that need. By offering product differentiation, a 90 day Step-Up program, and other customer focused programs, EVGA is a clear leader in all categories: etail, retail, distribution, and system builders. With headquarters in Brea, CA, EVGA's global coverage includes EVGA GmbH in Munich, EVGA LATAM in Miami, and EVGA Hong Kong. For further information online about EVGA, visit <http://www.evga.com>.
