

EVGA Announces the EVGA GTX 285 FTW

Brea, California and Munich, Germany - Tuesday, January 27, 2009 □

EVGA Corporation, the leading-edge 3D processor graphics cards and motherboard manufacturer, announces the fastest single GPU graphics card on the market today, the EVGA GeForce GTX 285 FTW. The powerful 3D processor features the NVIDIA GeForce 285 GPU and 1GB of the fastest 0.8ns DDR 3 memory. Running at an impressive 720MHz core clock, 2,772MHz memory clock and 1620MHz shader clock, the EVGA GeForce GTX 285 FTW outperforms all other competitive products in all the three clock setting resulting in impressive performance advantages. The EVGA GeForce GTX 285 FTW will be immediately available in e-tail and retail at a recommended end user price of \$449.99.

"We are excited that our engineering team succeeded in tweaking the GTX 285 beyond competitor's abilities," said Wolfram Tismer, Managing Director of EVGA in Europe. "EVGA always strives to give significant performance advantages to our enthusiast end user community."

"I am very proud, that my R&D team developed all the efforts to succeed in pushing the core clock significantly beyond 700 MHz," commented Ken Huang, EVGA's Vice President of R&D for 3D processor graphics cards. "EVGA will always develop something special, to give our user community more powerful options."

Products will be available starting January 28, 2009 through EVGA's network of leading E-tailers, Retailers, Systems Integrators, OEM System Manufacturers and Distributors.
