

EVGA Announces 210 and GT 220 Graphics Cards

Brea, California and Munich, Germany - Monday, October 12, 2009 □

EVGA, the leading-edge 3D processor graphics cards and motherboard manufacturer, announces the EVGA GeForce 210 and GT 220 graphics cards, offering great price, performance and features. The 210 and GT 220 products offer DirectX 10.1 support, NVIDIA PhysX technology, HDMI 1.3a output and NVIDIA CUDA technology meaning these new cards are essential for any media PC!

Gorgeous Graphics

Modern games and 3D applications demand more graphics performance than ever before and integrated graphics simply aren't good enough. The NVIDIA efficient designs can deliver up to 30x the performance of integrated solutions! If you want to play popular games like World of Warcraft, Spore, Sims3, Left 4 Dead or Fallout3, the GeForce 210 or GT 220 is an essential addition to your PC.

Fantastic Video

Get all the video processing power that your digital lifestyle requires. Clean up home video and post to Facebook 4x faster. Convert your video and put it on your iPod in minutes instead of hours or make your DVDs look like HD. Does your PC have a CPU powerful enough to playback high definition Blu-Ray Movies? It doesn't matter, these new cards can playback any Blu-Ray movie with any CPU.

Premium Windows 7 Experience

Graphics processing units (GPUs) are an essential element of today's PCs, enabling more visual and more interactive experiences. As a leader in visual computing and the inventor of the GeForce GPU, NVIDIA worked closely with Microsoft on the development of Windows 7 to ensure that its GPUs take full advantage of the great new features and functionality. If you use your PC to enhance photos, watch or edit videos, play games, or if you simply desire a fast and efficient graphical interface, NVIDIA GPUs will surely delight your senses and offer a premium experience for Windows 7.
