

Introducing the EVGA GeForce GTX 750 and GTX 750 Ti - The Next Generation in Power

- **Tuesday, February 18, 2014** □ Step up to EVGA GeForce GTX gaming with the new GTX 750. Its powerful, ultra-efficient, next-gen architecture makes the GTX 750 the weapon of choice for serious gaming at an incredible value.

GTX 750 and GTX 750 Ti cards give you the gaming horsepower to take on today's most demanding titles in full 1080P HD. They deliver 25% more performance than previous-generation cards and up to twice the power efficiency, thanks, to the next generation NVIDIA Maxwell architecture. Plus, they come loaded with GeForce GTX gaming technologies like NVIDIA GameStream, G-Sync and GeForce Experience.

If you're looking for hyper-realistic gameplay, stunning visuals and exceptional value, this is your graphics card!

EVGA GeForce GTX 750 Ti & 750 Features:

- +25 Watts on GTX 750 Ti & 750 ACX – Bonus 6pin power input connector provides an additional 25 watts, giving you an increase in power of 35%! This increase in power gives the card significantly improved overclocking headroom.
- NVIDIA G-SYNC Ready – The EVGA GeForce GTX 750 series have full support for NVIDIA G-SYNC Technology with included DisplayPort connector.
- Double Ball Bearing Design – The EVGA ACX Cooler features a double ball bearing design, meaning the fans have an average lifespan of 12 Years!
- Copper Core Insert included on EVGA Superclocked range of 750 Ti & 750 – Lowers temperatures by 5 degrees Celsius
