

EVGA announces the EVGA e-GeForce 9600GT Family GPU's

Brea, California and Munich, Germany - Thursday, February 21, 2008 □

EVGA, a market leader and premier provider of high-performance graphics solutions and motherboards today announced a new Price/Performance DirectX 10 card, the EVGA e-GeForce 9600 GT Family.

The EVGA e-GeForce 9600 GT once again sets a new standard for Price/Performance cards with 64 Stream Processors and a 256bit memory bus! Additionally, the 9600GT family has full support for PCIe 2.0, and PureVideo HD, allowing full playback of HD DVD and Blu-ray movies offloaded to the GPU. Backwards compatibility ensures that the EVGA 9600GT is perfect for today's and tomorrow's motherboards.

EVGA is also raising the bar with the 9600GT SSC. The SSC version takes the 9600GT feature set and cranks it up a notch with a 740MHz Core, and 1.83GHz Shader Clock! 100% strict in house testing ensures top notch quality, performance and reliability. Remember, when you see EVGA SSC, think the biggest and baddest of its kind, the top performing card in its class.

"The new EVGA 9600 GT SSC version once again sets EVGA apart from the rest, offering the highest performance in class." Said Andrew Han, President and CEO of EVGA.

Additional features of the EVGA 9600GT include:

Fully Unified Shader Architecture
Microsoft DirectX 10/Shader Model 4.0 Ready
128-Bit High Dynamic-Range Lighting, with Anti-aliasing support!
First ever PCIe 2.0 compatible card.
16X Anti-aliasing Technology
NVIDIA SLI Ready
PureVideo HD Engine
Built for Microsoft Windows Vista
Products will be available starting February 21st, 2008 through EVGA's network of leading E-tailers, retailers, systems integrators, OEM system manufacturers and distributors.

The EVGA Difference
