EVGA Announces EVGA X58 SLI Classified!

Brea, California and Munich, Germany - Wednesday, March 11, 2009 □
EVGA Corporation, the leading-edge 3D processor and motherboard manufacturer, announces the most forward looking motherboard on the market today, the EVGA X58 SLI Classified. The EVGA X58 Classified motherboard goes beyond anything that was ever imagined in the past and raises the bar for enthusiast grade motherboards everywhere. The EVGA X58 Classified motherboard is engineered for those who demand more than just the best.

Many Manufacturers are stuffing the CPU Core Power Circuitry with endless phases without looking at the big picture. We take a very first to very last approach instead." said Peter "Shamino" Tan, Overclocking Evangelist for EVGA. "First the +12v comes into the board through the 8 pin CPU Power Connector. We remove the bottleneck here by doubling the current input capability with dual +12v. Next, the +12v is processed through a beefy 10 phase Digital PWM with a switching frequency of up to 1,333KHz, twice the speed of typical Digital PWMs and three times the speed of typical Analogue! Furthermore, you can adjust the switching frequency through the BIOS from 800KHz to 1,333KHz, deciding between power efficiency and heavy overclocking or benching.

"Next, a super-low ESR and ESL film capacitor placed right behind the CPU socket ensures the cleanest power goes into your CPU. This finally passes on to a high quality CPU socket with three times the normal amount of gold content for the lowest impedance and highest current transfer, and of course, the socket is anodized a slick shiny black!"

New and Key features introduced on the EVGA X58 SLI Classified motherboard:

□ Supports Intel® Core□ i7 Processors
□ Intel® X58 Express Chipset with the ICH10R Southbridge
□ Supports over 6.4 Giga-transfers per second
□ Supports Intel® Turbo Boost Technology
□ Supports RAID 0, 1, 5, 10
□ EVGA VDroop Control
□ 100% Solid State Capacitors
□ 6 DIMM triple-channel DDR3
□ Enthusiast layout supporting 2-way, 3-way SLI and CrossFireX with an additional PhysX / 1x PCIe card!
□ 10 SATA II 3.0GB/s ports (1 e-SATA)
□ EVGA EZ Voltage
□ Adjustable PWM Frequency
□ EVGA E-LEET Tuning Utility Software
□ EVGA SPD Tool
□ EVGA ECP (EVGA Control Panel)

The EVGA Difference

Known for offering value and performance, as well as top notch customer service, EVGA is recognized through customer loyalty and the highest levels in customer satisfaction. In addition to the expanded product lines, consumers and channel partners will also benefit from increased sales and technical support programs:
The EVGA Limited Lifetime Warranty - For all retail products ending in part number -AR. EVGA proprietary Advanced RMA (EAR) service - for allowing customers get a replacement card before sending the defective product back to EVGA. 24/7 Phone Technical Support - to assure users that courteous and friendly assistance will always be available at anytime of the day or night. Step-Up□ Program - for the ability to trade up existing EVGA products for newer technology.Community Message Boards -full of thousands of knowledgeable, friendly and satisfied EVGA customers.EVGA MODS RIGS - show off your rig, win cash prizes.EVGA Gaming - EVGA game servers open 24/7 featuring the latest games.

About EVGA

EVGA is the #1 NVIDIA authorized partner in channel sales throughout North America. Based on the philosophy of intelligent innovation, market knowledge, and the real time operation, EVGA continues to identify the need in the market place and providing the solution to that need. By offering product differentiation, a 90 day Step-Up program, and other customer focused programs, EVGA is a clear leader in all categories: etail, retail, distribution, and system builders. With headquarters in Brea, CA, EVGA's global coverage includes EVGA GmbH in Munich, EVGA LATAM in Miami, and EVGA Hong Kong. For further information online about EVGA, visit http://www.evga.com.
