

EVGA Announces the PD02 PCoIP(R) Zero Client!**- Wednesday, April 6, 2011** □

We are proud to introduce EVGA's latest VMware-Certified PCoIP(R) Zero Client for Cloud Computing: the EVGA PD02. This new version with a smaller footprint, reorganized layout and sleek look make this the ultimate Zero Client device, at a very attractive \$299 price point.

Why PCoIP Zero Clients? Reduce your total cost of ownership, free up desk space, and eliminate the provisioning, maintenance, and support of desktop PCs while still providing a true uncompromised PC experience. The EVGA PD02 PCoIP is a true Zero Client that provides a small footprint, low power operation, centralized virus protection, operating system versatility, and full USB device support. Centralized computing is now a truly viable option for all user types, either locally via LAN or remotely via WAN.

New and Key features introduced on the EVGA PD02 PCoIP Zero Client:

- * No Windows or Linux OS
- * No device drivers
- * Data never leaves the data center
- * No virus or spyware to worry about
- * VMware View 4.5 Certified
- * Supports richest multimedia experience from task workers to power users
