

**EVGA announces its latest motherboard □ the EVGA NF 47****Brea, California and Munich, Germany - Friday, May 5, 2006 □**

EVGA Corporation, one of the leading-edge 3D processor and motherboard manufacturers, today announced the latest addition to its line of high-performance SLI-ready motherboards, the EVGA NF 47.

Designed for the enthusiast who wishes to take full advantage of the next generation of games and SLI GPUs, the EVGA NF 47 features two full-bandwidth, 16-lane PCI Express links to ensure maximum graphics performance. At twice the PCI Express bandwidth of x8 SLI solutions, the EVGA NF 47 delivers the performance boost that extreme gamers crave.

The EVGA NF 47 is built with NVIDIA nForce®4 media and communications processors (MCPs), which deliver unbelievable PC performance, and unmatched security, storage, and PCI Express technology to both Intel and AMD platforms, including the AMD 939 CPU. Designed with an innovative low-latency, highly-integrated architecture, NVIDIA nForce4 MCPs reside on the EVGA NF 47 motherboard and offer a world-class feature set for overall PC performance.

Products will be available from select online e-tailers.

**About EVGA**

EVGA is the #1 NVIDIA authorized partner in channel sales throughout North America. Based on the philosophy of intelligent innovation, market knowledge, and the real time operation, EVGA continues to identify the need in the market place and providing the solution to that need. By offering product differentiation, a 90 day Step-Up program, and other customer focused programs, EVGA is a clear leader in all categories: etail, retail, distribution, and system builders. With headquarters in Brea, CA, EVGA's global coverage includes EVGA GmbH in Munich, EVGA LATAM in Miami, and EVGA Hong Kong. For further information online about EVGA, visit <http://www.evga.com>.
