

Introducing the EVGA GT Power Supplies

- Wednesday, June 3, 2020 □

Introducing the EVGA SUPERNOVA GT Series - Redefining Quality, Performance and Value
Refinement In Performance and Design

Upgrade both aesthetics and electronic components with a unique radial design fan grill, compact 150mm length and width, and 100% Japanese capacitors.

80 PLUS GOLD EFFICIENCY

80 PLUS Gold Certified. Ensures that your power supply is 90% efficient or higher.

750 GT Efficiency

650 GT Efficiency

Fluid Dynamic Bearing

The EVGA SuperNOVA GT uses a long-life 135mm fan with a Fluid Dynamic Bearing (FDB) for silence, reliability, and a longer life expectancy.

Single +12V Output

Provides a stable output for compatibility with the latest hardware.

Fully Modular Design

Choose the cables you need to make cable management simple and clean.

Auto ECO Mode

Fan RPM adapts to the PSU temperature. The fan will shut off in a low temperature/low load environment, resulting in reduced noise.

Full Protection

OV Over Voltage Protection OC Over Current Protection OP Over Power Protection SC Short Circuit

Protection UV Under Voltage Protection Dual OT Over Temperature Protection on the Primary and Secondary PCB
