EVGA introduces the latest addition to its GeForce 7 Series family, the 7950 GX2 ☐ Two GPUs on one board with 1GB of total memory

Brea, California and Munich, Germany - Monday, June 5, 2006 ☐ EVGA Corporation, one of the leading-edge 3D processor and motherboard manufacturers, today announced the latest model in its premier product family, the EVGA e-GeForce 7950 GX2. This is the first product in the history of EVGA to feature two Graphic Processor Units (GPUs) on a single board with 1GB of total memory

The EVGA e-GeForce 7950 GX2 features a knockout pair of GeForce processors on one irresistibly powerful board. Resetting the bar for single board graphics performance with amazing 3D horsepower and speed, the e-GeForce 7950 GX2 enables a lightning-fast, hyper-realistic gaming experience with ultra-smooth frame rates. This dual-GPU board features an astounding 1 GB of fast GDDR3 memory and support for resolutions up to 2560 X 1600 for XHD gaming.

Products will be available starting June 5, 2006 through EVGA's network of leading E-tailers, retailers, systems integrators, OEM system manufacturers and distributors.

About EVGA

EVGA is the #1 NVIDIA authorized partner in channel sales throughout North America. Based on the philosophy of intelligent innovation, market knowledge, and the real time operation, EVGA continues to identify the need in the market place and providing the solution to that need. By offering product differentiation, a 90 day Step-Up program, and other customer focused programs, EVGA is a clear leader in all categories: etail, retail, distribution, and system builders. With headquarters in Brea, CA, EVGA's global coverage includes EVGA GmbH in Munich, EVGA LATAM in Miami, and EVGA Hong Kong. For further information online about EVGA, visit http://www.evga.com.
