

## Step 1

Remove all 5 screws indicated below. Remember to keep all accessories in case your card needs to be returned to EVGA.

## Step 2

Remove the protective cover from the backplate. Place on back of card and align the screw holes.

## Step 3

Use the 5 provided screws to install the backplate to the PCB. Use the one long screw to mount the bracket. All provided screws use a #1 Phillips head. Once the backplate is firmly attached to the card you are now ready to install your GTX 750 / 750 Ti graphics card.
