

EVGA H55 motherboards feature the Intel H55 Express chipset supporting Socket 1156 based processors. This motherboard is engineered to be the ultimate media platform with support for DVI, VGA and HDMI right on the board, an external graphics card is not necessary.

Also, the EVGA H55 motherboard is completely upgradable, meaning you can install an EVGA graphics card for ultimate gaming performance. Normally, one would think that a motherboard with features such as these would come at a hefty price tag, but the EVGA H55 offers performance at a great price!

## KEY SPECS

- Supports Intel® Socket 1156 Processors
- Intel® H55 Express Chipset
- 4 DIMM Dual-Channel DDR3 1333MHz up to 16GB
- 3 Display outputs 1 DVI, 1 VGA, 1 HDMI
