

They say big things come in small packages. They are right. The EVGA Z77 Stinger has arrived and this board brings enthusiast features, overclocking and performance, to a mITX form factor. Features like native PCI-E 3.0, SATA 6G and USB 3.0 are included here, along with an Intel Gigabit Network controller, Mini-DisplayPort, HDMI and more!

EVGA knows that power is critical for a performance board, no compromises were made because of the size. The EVGA Z77 mITX features 7+1 power phases, complete with POSCAP and Solid State capacitors delivering clean, stable power to your CPU for maximum over clocking support.

Don't let the small size fool you, the EVGA Z77 Stinger has plenty of storage options. Native USB 3.0 support delivers super speed performance for next generation storage devices, and native SATA 6G enables maximum performance on the latest solid-state and mechanical storage drives.
