

The EVGA Classified SR-2 Motherboard is a landmark in the world of motherboards and the absolute definition for extreme PC performance. With dual CPU support, 4-way SLI support, SATA III 6GB/s, USB 3.0, and much more; this setup sets new standards for what was once considered a high end platform.

Whether you are an extreme gamer, overclocker, power user, workstation user, server admin, folder/cruncher, or just a PC enthusiast; this is the ultimate board for you.

This board is designed from the ground up to not only break records, but to be able to complete any task you throw at it faster than you ever thought possible.
