

GTX TITAN X Hybrid Waterblock

Part Number: **400-HY-0990-B1**

The HYBRID cooler for the GeForce® GTX™ TITAN X is an “all in one” water cooling solution that significantly lowers the GPU operating temperature. Best of all? The water cooler is completely self-contained, with an included 120mm radiator and fan. No filling, no custom tubing, no maintenance. Just plug in and play! This upgrade kit is compatible with all “reference” GeForce® GTX™ TITAN X graphics cards and even includes a custom shroud.

FEATURES

- All in one cooling solution that is completely self-contained. No filling, no custom tubing, no maintenance. Just plug and play.
- Intelligent wiring system and sleeved tubing make this one sleek cooler without the messy wires.
- Variable controlled fans allow dynamic fan speed based on GPU temperature, and the water cooling efficiency means very low noise fans.
- VRM and Memory cooling solution separated from GPU, allowing for lowest GPU temperatures, and efficient VRM and Memory cooling.
- Compatible with all “reference” GeForce® GTX™ TITAN X graphics cards.
