

Everyone knows that the **EVGA PowerLink™** does wonders to *improve your cable management* for your graphics card. But did you know that the **EVGA PowerLink™** also **stabilizes the power** going into your graphics card?

## POWER MATTERS

The EVGA PowerLink™ is designed to provide both a **more stable power source** and *reduce ripple and noise*, compared to connecting your power supply directly to the graphics card.

The PowerLink™ features two solid state capacitors that help to filter/suppress ripple and noise from the power supply.

The PowerLink™ draws power from two 8-pin PCIe connectors, even if your graphics card only has one PCIe power connector. In doing so, the PowerLink™ balances the power drawn by the graphics card, thereby improving stability.

## REDUCES VOLTAGE VARIATION

The practical impact can be seen in power graphs. We took an EVGA GeForce RTX 2080 and ran Unigine Heaven Benchmark, and you can *see the difference:*

The 12V line going into graphics card without a PowerLink™ under load rates a Peak-to-Peak voltage of 1,008mV, while the 12V line going into the graphics card with a PowerLink™ is *only 728mV*. That's nearly a **28%** reduction in voltage variation from the external power source!

### PRODUCT WARRANTY

This product is covered under EVGA's 2 year limited warranty which covers parts and labor. For more details please visit [www.evga.com/warranty](http://www.evga.com/warranty).

### Technical Support

EVGA is here for you day or night to help answer any questions!

### STABLE POWER

A more stable voltage reduces the wear and tear on graphics card components, which can increase the lifespan of the graphics card.

### REVOLUTIONIZED CABLE MANAGEMENT

The EVGA PowerLink™ has another function: to make your PC look even more awesome. This adapter allows you to reroute the power inputs for your graphics card, giving you improved case airflow, a lower profile height, and best of all, cleaner wiring setup. It even supports a unique configuration system allowing you to mix and match power input types to match your EVGA graphics card.

### EVGA PowerLink Supports:

- ALL EVGA GeForce RTX 2080Ti/2080 Super/2080/2070 Super/2070\*
  - ALL NVIDIA GeForce RTX 2080 Ti/2080 Founders Editions
  - ALL EVGA GeForce GTX 1650/1080Ti\*/1080/1070
  - ALL NVIDIA Founders Edition GeForce GTX 1080 Ti/1080/1070 Ti/1070
  - MOST EVGA GeForce RTX 2060 Super/2060
  - MOST EVGA GeForce GTX 1660 Ti/1660/980 Ti / 980 / 960 / and 950
- \* Excludes EVGA GTX 1080 Ti KINGPIN, EVGA GTX 1080 Ti KINGPIN HYDRO COPPER, and EVGA RTX 2070 BLACK Gaming
