

Artistically Crafted

The **EVGA SC17 1070 Gaming Laptop** has arrived. This **4K ready**, high performance laptop was meticulously created from the ground up for the hardcore gamer, performance enthusiast, and even overlocker. No shortcuts here.

It all starts with power, an in house EVGA designed power supply with a new unique form factor helps deliver up to **240 watts of power** when needed, without compromising battery life.

An **Intel Core i7 6820HK CPU** that is unlocked and capable of being overlocking to **3800MHz** and beyond, combined with an **NVIDIA GeForce GTX 1070**, also capable of being overlocked, lets you get the performance you always wanted from a gaming laptop.

Did we mention that the **EVGA SC17 1070 Gaming Laptop** is built for overlocking? A **FULL GUI BIOS** with full mouse control gives you complete control over all aspects of performance, voltage and advanced settings right at your fingertips. Not to mention, a **Clear CMOS button** directly on the chassis, this is the world's first **TRUE** overlocking laptop.

A sleek design rounds out the package with a full unibody chassis, and slim design that is under 1.07in at its thickest point. This is just the beginning. **USB 3.1 Type C**, excellent sound, and a beautiful **4K 17"** display is what you get when you cross performance with art.

Features

- **Unibody Design** – A sleek design and thin 1.07in thickness means this is one of the sleekest laptops around.
- **4K UHD Display** – A Sharp IPS display capable of delivering up to 4K resolution for crystal clear graphics.
- **Incredible Hardware** – An Intel Core i7 6820 HK Unlocked processor combined with an NVIDIA GeForce GTX 1070 graphics gives you unbelievable performance in the latest games.
- **Built to Overclock** – Overclocking on a laptop? Seems like a myth, but not here. A full GUI BIOS with full control, and EVGA PrecisionX mobile for Windows tuning.
- **EOC (EVGA Express OC)** – Overclocking at your fingertips. Use up/down arrow keys allowing you to enable Superclocked performance, or downclock mode to improve battery life.
- **BIOS** – The EVGA SC17 Gaming Laptop ships with a REAL BIOS. This means full GUI support including mouse, complete control over all overclocking features such as CPU and GPU.
- **EVGA PrecisionX Mobile** – The power of EVGA PrecisionX, now mobile with EVGA PrecisionX Mobile. Tweak your overclock settings, profiles, and CPU overclocking right at your fingertips.
