The Z10 RGB keyboard was built with enthusiasts in mind. Now available with a full RGB backlit key layout with "per-key" customization. Along with the great features of the Z10 RGB, such as a magnetically-attached customizable wristpad, extensive macro controls, quick-switch profile buttons, volume and LED sliders, and spring-loaded feet to quickly move into strike position - the EVGA Z10 RGB puts performance and convenience no further than the tips of your fingers. Last, but not least, the Z10 RGB keyboard features your choice of in blue or brown mechanical Kailh® switches with N-Key rollover to ensure that you get exactly the type of feedback you want. With its sleek design, responsive typing, and highly-detailed user control panel, the EVGA Z10 RGB is the final piece missing from your system to ensure great looks and gaming dominance.

Switch **BROWN**

1. USB Ports
Conveniently connect devices to your keyboard - on either side.

2. E-Key
Quickly enable/disable features with the touch of a button.

3. EVGA Macro Keys
Create macros. Use macros. Lots of macros.

4. Volume / Brightness Sliders
Quickly adjust your Z10 experience on the fly.

5. LCD Display
Designed for utility. Monitor hardware, track game timers, or anything else you need.

6. Sturdy, reliable Kailh® Switches
Choose accuracy with the clicky Blue switches, or go silent with tactile Brown switches.

7. Magnetically Attached, Customizable
Wristpad – Find your perfect position with three settings.
